What do you think about our plans for our other projects and activities?: With regard to the new bridge I think it should be off the end of Melcombe St and across the river to West St. We already have a 4 lane highway through our town if this option is taken right from the old saleyards area to Racecourse Rd. Surely some way these existing roads can be used to their fullest potential without too much expense. If bypass is required for trucks it could be don South St along Chalmers Ave to Beach Rd and out of town in that direction until it meets up with an existing road which will take them North until they meet up with a road which will take them back onto SH1 at the other end. Seems quite simple to me.
