**Your Details**

Full Name: Andrew Blain

**Do you agree with our preferred option or do you support another option?**

Drinking water meters: Spread over 3 years - Our preferred option

Let us know why: Water preservation is important. Too many people waste it without any thought. I think limits will have to be imposed eventually, It's our most precious resource after all. I've noticed many leaking toby boxes which remain unnoticed for months. Any measures to reduce wastage has to be a good thing.

Elderly Persons Housing: Self-sustaining in 2 years - our preferred option

Let us know why: Users should pay. Self sustaining- yes

What do you think about our plans for our other projects and activities?: I think the current plan for the bridge location is logical. It's not perfect, but it will take pressure off the existing bridge. Anyone living east of SH1 Tinwald will have a good pathway to and from town, and it will be a smoother journey for eastern Ashburtonians travelling south. I believe it will tie the town together. I don't think it will send more trucks down Chalmers ave. Trucks will always take the shortest route and therefore stay on SH1. The eastern Tinwald area is growing continually and this is a good way to ease congestion at SH1. I don't think it would be a good use of rate payers money to start this process from scratch again. We don't need more delays, we need this bridge now.
