

**Submission to Ashburton District Council  
On Long Term Plan re: location of second Ashburton bridge**

→ +  
Im v. On viewing the reconstruction of SWH 1 from Rolleston and further North I observed a considerable amount of machinery and equipment space was required adjacent to the road works, therefore I consider the current proposal of the current route down Bridge St. and along Chalmers Ave to be totally ~~impracticable~~, impractical, & disruptive. I ~~consider the proposed bridge on Chalmers Ave to~~  
The increase in heavy trucks along this road would make living along this route noisy and dangerous especially for the elderly and children having to negotiate their way over these two roads, particularly for the many residents along this route trying to exit and enter their properties. There would be a huge impact required to fund the bridge at this location would have on Ashburton ratepayers.

\* I do not wish to speak in support of my submission.
