

Do you wish to speak in support of your submission at the hearing?: Yes

I am able to attend: Morning

I intend to attend: In-person

Would you like to be added to our database to be notified of future consultations?: Yes

Your Details

Full Name: Jane Grace

Do you agree with our preferred option or do you support another option?

Drinking water meters: Don't install meters

Let us know why: Until the three waters plan is adopted don't install meters to find leaks, use clip on meters which is an option you have not considered, cheaper and cost effective. The drinking water still does not comply to standard, this is a disgrace.

Elderly Persons Housing: Self sustaining in 7 years

Let us know why:

What do you think about our plans for our other projects and activities?: No to swimming pool fence inspections \$174.00 photos should be sufficient, especially if an indoor pool No to building consent charge increases - this needs to be justified as to the necessity No to the large scale library and civic centre project!!! The roads around the district are a disgraceful state and the poor quality products used needs to be addressed, the roads should not be melting as frequently as they are, assess what is failing. Parity in the provision and charges of water is necessary, the rates already reflect the area of a property, now to divide the Methven township into Ordinary and Extra-Ordinary is not acceptable. If water meters are a requirement for one, they should be for all or not at all. The proposed rate increase is way too high, to simply provide improved administration, it should be competent at present! Spend rate payers money on improving our drinking water to make it to standard!
